

BYBLOS+

The PM Aluminium Threshold Solution

PM GROUP

producer and supplier of PVC and Wood Carpentry Accessories

PM Group has over 20 years' experience in the market of accessories for PVC and Wood Carpentry. We are present on the global market thanks to two product divisions from our companies: PM Technic Elements and PM Aluminium Line.

Regarding logistics, our warehouses are located in countries such as Romania, Italy and Hungary, and PM Group is expanding continuously. With over 2000 products in our portfolio serving more than 5000 clients in 7 countries, PM products manufactured in the PM factory in Turkey stand out on the market through their quality and innovative features, providing our clients with benefits in terms of both time and quality.

PM's product range is diverse and covers all stages of the building process which involve woodworking. Our products stand out by their safety as well as their quick and easy assembly, and are delivered with all the accessories needed for assembly.

In 2024, we launched the BYBLOS+ brand, the PM solution for aluminum thresholds and drainage boards.

Why BYBLOS?

BYBLOS is one of the oldest historically documented seaports. The name has strong historical meanings conveying values similar to ours: continuous development, sustainability, innovation and resilience.

What do the PM aluminum threshold system and BYBLOS have in common?

Both mark the transition between two zones (outside/inside vs water/dry).

Both provide safety for larger communities (city) or smaller ones (residents of a building).

Both are opening lines to new horizons.

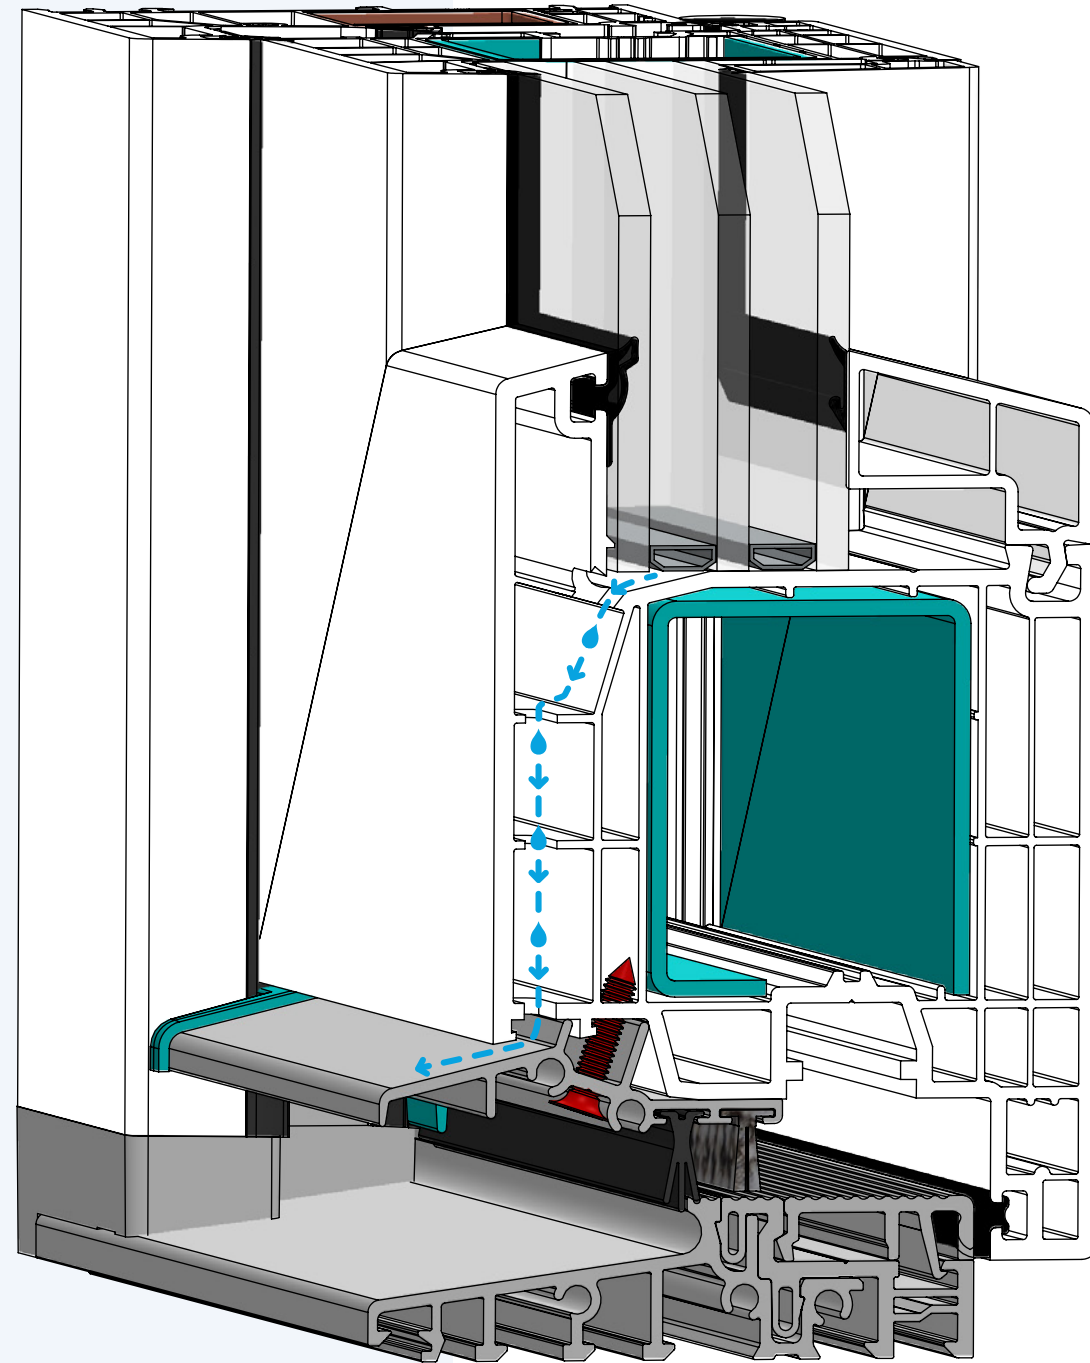

The BYBLOS+ solution for doors with personality!

THE PREMIUM SOLUTION FOR ALUMINUM THRESHOLD – BYBLOS+

The PM group offers not only a product but
a premium solution: BYBLOS+

The PM BYBLOS+ threshold solution stands out for its outstanding technical and aesthetic qualities. It is composed of elements made with attention to detail, being the ideal solution from the point of view of isolation and also from the point of view of assembly.

PM BYBLOS+ threshold solution

- Threshold made of highest quality extruded aluminum
- Custom threshold covers for the door frame profile
- Aluminum drainage profile system for fixed or double door with drainage board covers for the door profile and sealing brushes
- Threshold riser

1

ALUMINIUM DOOR THRESHOLD SYSTEM BYBLOS+

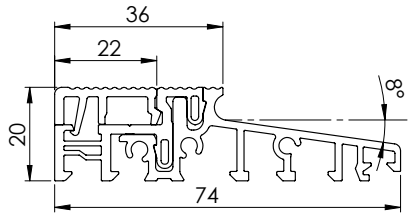

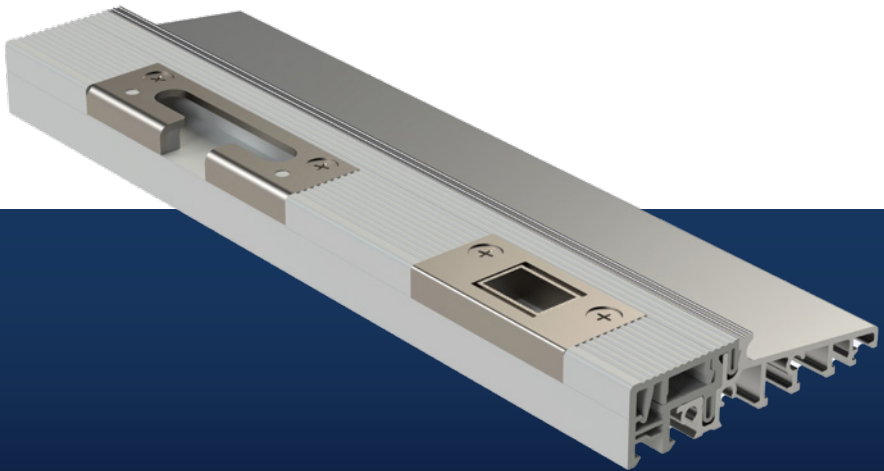

The threshold is an essential door component. The threshold is subject to intense wear and tear, so it needs to withstand mechanical stress. It is equally designed to ensure a tight seal - with permeability barrier function and acting as a barrier to dust and temperature.

PM Aluminium Threshold

Made of the best quality aluminum the PM threshold ensures resistance to heavy traffic and a high degree of thermal efficiency

Technical characteristics:

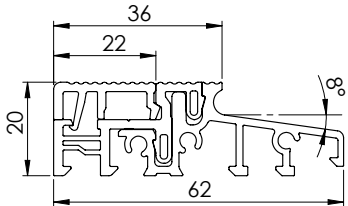

- Made of the highest quality extruded aluminum
- It prevents the passage of air, dust and light
- Thermal insulation
- Soundproof
- High resistance to mechanical stress
- Thermal barrier of 22 or 24 mm
- 36mm PM threshold suitable for AD profiles or 45mm PM threshold for MD profiles
- The minimum order is one bar 6m long
- Suitable for constructions without passage barriers with a height of only 20 mm
- Attractive appearance
- Concealed grip
- The packaging is recyclable

Threshold Covers PM

The PM aluminum threshold system cover provides high torsional strength and increases the rigidity of the door frame

Materials: Made of 6.6 polyamide reinforced with 15% glass fiber with excellent resistance to impact and wear.

THRESHOLD COVER PM – T profilie

The PM door threshold comes equipped with all the necessary elements to provide security for the entrance door.

SECURITY STRIKER

It consists of two parts:

- plastic lower body (ASA)
- upper body made of galvanized sheet, provided with two countersunk holes for screw fixing.

Width: 22 mm or 24 mm can be used for all PVC profiles

Length: 80 mm

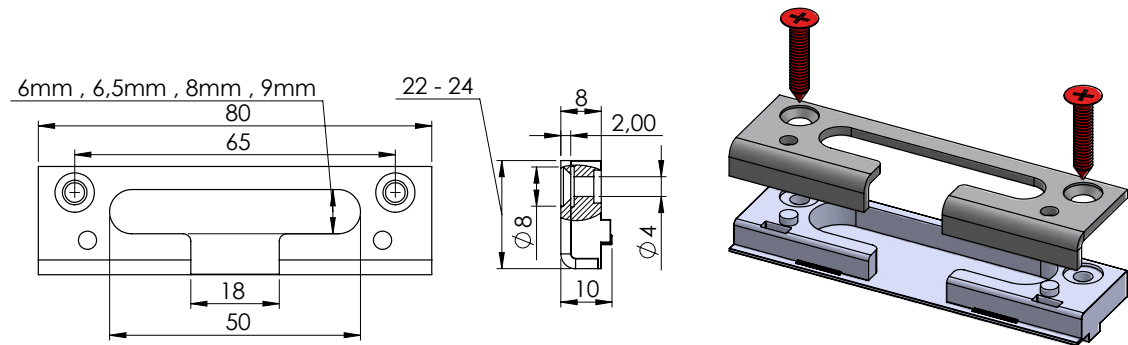

22 mm Width:

PM ALUMINIUM DRAINAGE SYSTEM BYBLOS+

It differentiates itself in the market by the outstanding aesthetic qualities but also by the functionality of the side cover system for double doors (DOUBLE DRAINAGE PROFILE COVER – patented as an innovation) ensuring an optimal sealing against the wet weather.

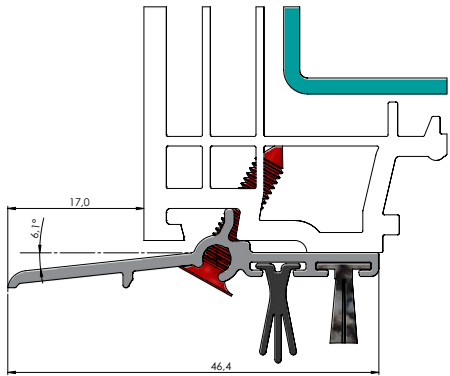

ALUMINIUM DRAINAGE SYSTEM SUITABLE FOR EXTERIOR DOORS WITH OR WITHOUT WINDOWS

Made by a high-precision extrusion process from an AA 6063-O alloy.
The brush seals can be easily installed and replaced.

Characteristics:

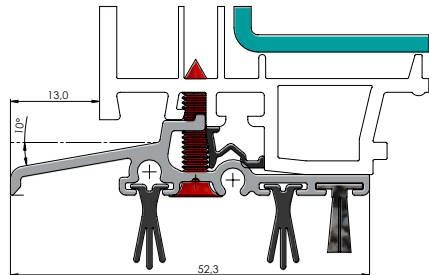

- Made of the highest quality extruded aluminum
- Prevents the passage of water, dust and light
- Made of two parts (one fixed part and one clip-on profile)
- Prevents rainwater from draining from the door into the building
- High resistance to mechanical stress
- Adaptabil pentru toate profilele de uşă existente pe piaţă
- Attractive appearance, forms a coplanar visual assembly together with the PM aluminum threshold
- Concealed grip

ACTIVE DOOR DRAINAGE PROFILE COVER

PASSIVE DOOR DRAINAGE PROFILE COVER

SIDE COVER

The covers are made of thermoplastic elastomers (TPE) and provide a high degree of tightness against dust, noise, light and water infiltration, having an important sealing role.

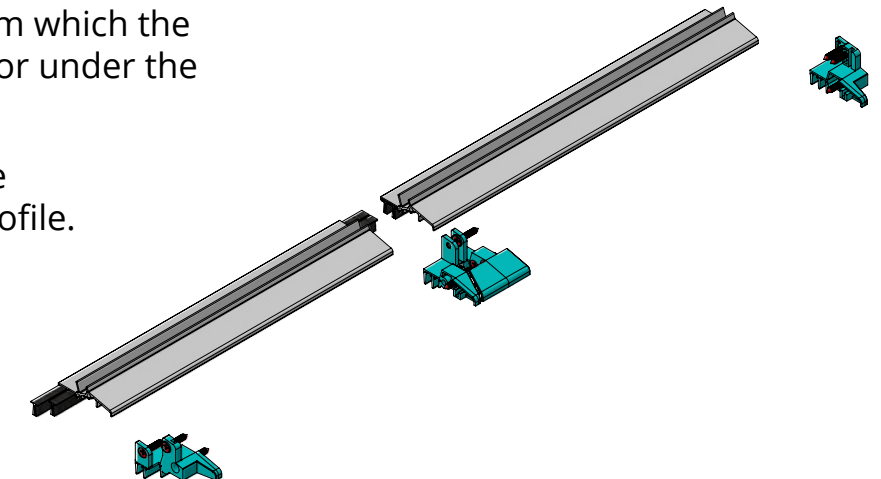

Due to the properties of the material from which the covers are made, they do not change color under the influence of time and external factors.

The drainage board mounting screws are weather resistant and fixed under the profile.

Recommended mounting screw:
3,9 x 32 mm

Brush:

6,8 x 8 mm	6,8 x 15 mm
6,8 x 18 mm	6,8 x 25 mm

DENOMINAZIONE COMMERCIALE DEL MODELLO:
PORTA FINESTRA DUE ANTE BYBLOS+

CLASSIFICAZIONE CONSEGUITA:

- PERMEABILITA' ALL'ARIA SECONDO EN 1026 E UNI EN 12207: 4
- TENUTA ALL'ACQUA SECONDO EN 1027 E UNI EN 12208: 4A
- RESISTENZA AL VENTO SECONDO EN 12211 E UNI EN 12210: C2

La Direzione Generale
Sergio Mora
Tutti i risultati di prova, con valori misurati sperimentalmente, indicati nella presente sintesi sono contenuti nel rapporto di prova n. 19/2024 del 13/06/2024 emesso da questo Laboratorio.

Il Direttore Tecnico
Ing. Antonio D'Albo

THRESHOLD RISER BYBLOS+

For optimal thermal insulation and waterproofing of exterior doors made of aluminum, PVC or wood.

TSV THERMO GREEN BASE THERMAL INSULATION PROFILE

used for optimal thermal insulation and waterproofing of doors

The base thermal insulation profile is made of 100% recycled PET and is used for the optimal thermal insulation and waterproofing of doors made of plastic, aluminium or wood. The TSV Thermo Green profile complements the PM door sill system and stands out through its resistance, very high thermal efficiency and quick and easy assembly.

The TSV Thermo Green base thermal insulation profile offers thermal insulation, thus reducing the thermal bridges found in common plastic profiles.

The TSV Thermo Green base thermal insulation profile has a width of **62-92 mm** and was developed specifically for the PM door sill system as a profile to be mounted under the door sill. It is available in various heights: **30 mm, 50 mm, 70 mm, 100 mm, 120 mm, 150 mm, 200 mm and 250 mm**. It is

possible to order a custom model for other heights. The standard length of the profile is **2440 mm**, but it can be adapted depending on the door size: for larger sizes, gluing is possible thanks to the technical characteristics of the material. Thanks to its reduced weight and compact dimensions, the TSV Thermo Green base thermal insulation profile is processed easily, with unparalleled speed.

Characteristics	unit	TSV Thermo green	Standard
Density rating	kg/m³	180	ISO 845
	lb/ft³	11,2	
Thermal insulation performance (U)	W/(m²k)	0,6	EN12667
